FaxChain

FaxChain FAX

FaxChain is a public blockchain consists of one mainchain and two sidechains, through logical decoupling and independent implementation of FaxChain (Primary Chain), FaxMax and FaxSpace, which are drived by the only incentive-token FAX, it provides a open source, secure and scalable platform through P2P network, to realize fast transaction, low cost and reliable operation.

Decentralized virtual computer

Blcokchain Efficiency

区块链效率

7	15	1000
Pen/SEC. 笔/秒	Pen/SEC. 笔/秒	Pen/SEC. 笔/秒
BTC	ETH	EOS Tron

Currently far lower than the internet processing speed with megabits level TPS

相比互联网目前处理速度百万级TPS相差甚远

Data&asset isolated island

数据和资产孤岛

Various blockchain systems are trapped in the native network. They lack the ability to connect and verify with each other. Only through cross-chain technology that can be connected to each other, providing data Interoperability and breaking through the isolated islands of data&asset.

各不同区块链系统仍被困在原生网络中，相互之间缺乏互相连接和验证的能力，唯有通过跨链技术使数据之间可以互相连接，提供数据的互操作性，打通数据和资产的孤岛。

Data storage

数据存储

Global data are growing exponentially

全球数据成指数级增长

Data storage and analytics are lagging far behind its growth.

数据存储和分析算力远落后其增长速度

Bright Future

未来可期

FaxChain connects distributed computing and storage resources by rewarding miners with Cryptocurrency of FAX.

FaxChain通过对提供运算和存储能力的矿工给予Cryptocurrency的奖励，连接分散的算力和存储资源

FaxChain provides the decentralized LAAS service with infinite expansion of computing, storage, high processing capacity, cross-chain capacity, so that distributed applications can easily complete the generation, interaction, transmission, storage, retrieval and calculation of data

FaxChain提供可无限扩展的算力和存储、高吞吐量计算、快速网络传输在内的去中心化LAAS服务，使分布式应用可以轻松完成数据的生成、传输、存储、检索和计算。

FaxChain Profile

FaxChain简介

The invention relates to a distributed fog computing fog storage system

一种分布式雾运算雾存储系统

- Smart contract 智能合约
- Cross-chain technology 跨链技术
- Data storage 数据存储
- Internet of things 物联网
- AI （artificial intelligence）人工智能

Smart Contract

智能合约

1.Decentralized EVM implements smart contracts

2. Turing-Complete programming solution that mixes languages like Java, Go and Solidity

3. Sharding technology and decentralized Layer2 scheme are integrated to improve TPS to millions of levels

1. 去中心化EVM执行智能合约
2. 图灵完备的编程方案，融合Java、Go和Solidity等语言
3. Shading分片技术、去中心化Layer2方案综合提升TPS至百万等级

Cross-Chain

跨链技术

Tendermint

Frame
框架

Secure and stable high-performance framework
安全稳定且高性能的框架

Tendermint Core + ABCI Application

Consensus engine 共识引擎

Application program interface 应用程序接口

IBC

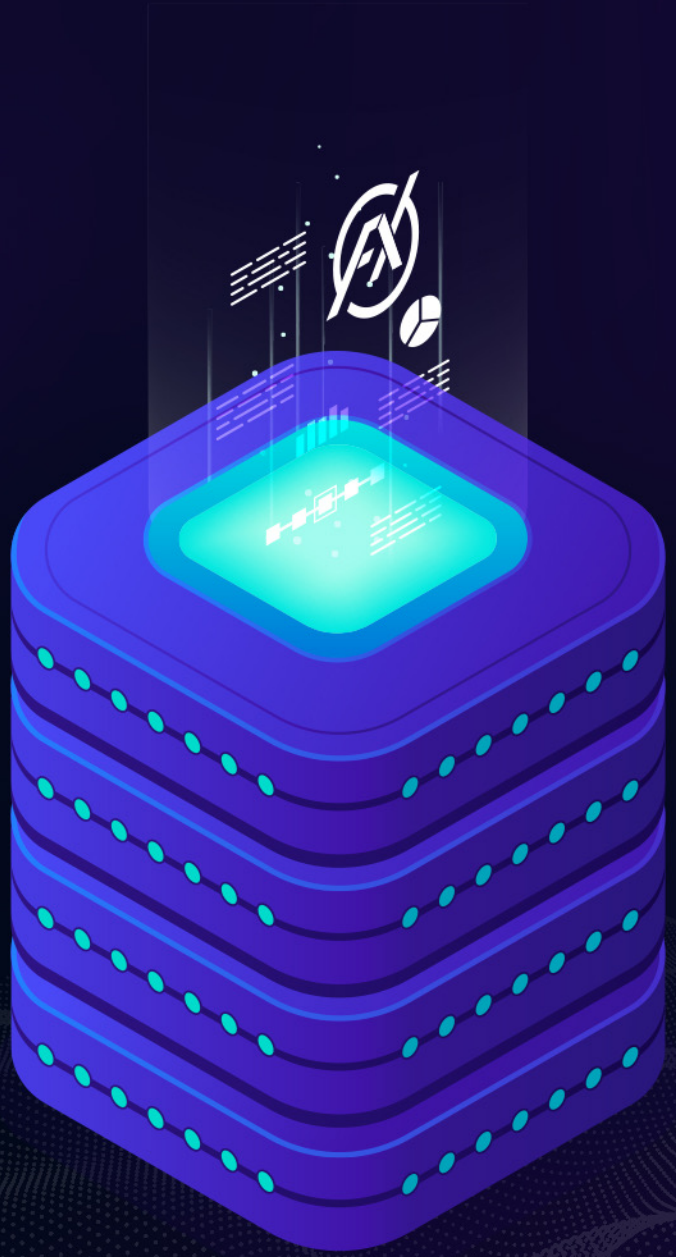
Cross-blockchain 跨区块链通信协议
Communication Protocols

Allows different chains to communicate with each other
允许不同链相互通信

FaxChain Ecology

FaxChain生态

- ★ FaxChain 公链
- ★ FaxWallet 去中心化钱包
- ★ FaxSwap 去中心化交易所
- ★ FaxScan 区块浏览器
- ★ FaxBridge 跨链桥
- ★ FaxVote 节点投票管理



Distributed storage

分布式存储

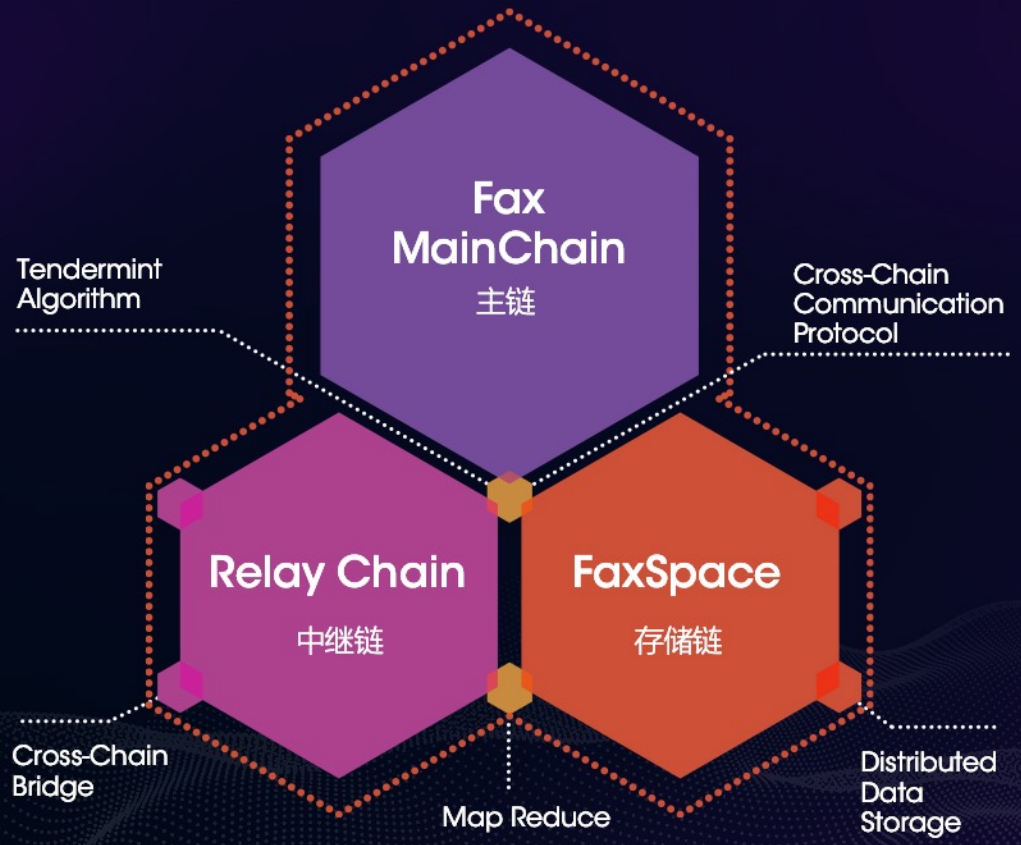
1. Truly decentralized data storage, with data privacy protected

2. An autonomously managed data system covering millions of nodes

3. Unlimited block storage, file storage, object storage, KV storage and table storage

4.Easily complete data generation, interaction, transmission, storage, retrieval and calculation

1. 真正的去中心化数据存储，对数据的隐私性得到保护
2. 一个涵盖数千万节点的自治管理的数据系统
3. 无限扩展的块存储、文件存储、对象存储、KV存储和表格存
4. 轻松完成数据的生成、交互、传输、存储、检索和计算



FaxChain Public Chain

FaxChain公链

Logical decoupling and independent implementation of FaxChain, FaxMax and FaxSpace

FaxChain公链由FaxChain、FaxMax、FaxSpace三条独立公链逻辑解耦和分别实现而成

1. Issue of FRC20、FRC721 tokens
2. DAPP development system
3. Cross-chain transaction verification
4. Data storage system

1. Frc20、Frc721通证发行
2. Dapp开发系统
3. 跨链交易验证
4. 数据存储系统

FaxSwap Decentralized Exchange

FaxSwap去中心化交易所

1. AMM automatic market making system
2. Cross-chain bridge asset conversion
3. Transaction fee repurchase mechanism
4. Board dividend mechanism
5. Transaction mining mechanism

1. AMM 自动做市系统
2. 跨链桥资产转换
3. 交易手续费回购机制
4. 董事会分红机制
5. 交易挖矿机制

FaxWallet
Decentralized Wallet

FaxWallet去中心化钱包

1. Private key holds multi-layer encryption
2. Multi-chain wallet - Support FAX/ETH/HECO/BSC/TRX
3. USDT algorithm anchors USDT-ETH and USDT-TRX
4.DApp Browser - Support FAX/ETH/HECO/BSC/TRX
5. Multi-chain, multi-currency cross

1. 私钥自持多层加密
2. 多链钱包 - 支持FAX/ETH/HECO/BSC/TRX
3. USDT算法锚定USDT-ETH和USDT-TRX
4. Dapp浏览器 支持FAX/ETH/HECO/BSC/TRX
5. 多链多币种互跨
